Introduction

India hosts one of the largest technology and startup industries in the world. It has a massive pool of young, smart, and bright people which contributes to the growth of all the technology-related industries. Blockchain and Cryptocurrency have become the fastest-growing space in India, and we want to introduce Tezos to the next thousand developers, startups, organizations & corporations. Our work is focused on 4 key areas mainly, but not limited to, which are following:

Our Key Focus Areas:

-  **Education** - We conduct regular education programs to enable the community to build on Tezos & learn about Tezos.
-  **Events** - We conduct events with ecosystem partners to bring rich discussions around the role of blockchains today.
-  **Ecosystem Development** - We help our ecosystem partners to leverage the power of Tezos by making relevant connections and help with grants on a case-by-case basis.
-  **Developer Activities** - Developer Activities - We actively conduct and support hackathons & other developer activities including our flagship program, Tezos India Fellowship, to enable individuals and teams to build innovative projects, PoCs on Tezos.

About Tezos India

Our Mission is to Build and Empower a well-rounded Tezos ecosystem in India.

6000+

75000+

18+

100+

125+

13+

2

Developers: Developers were educated via tezos clubs, students chapters, fellowship programs & hackathons

Community Members Reached : People reached via AMAs, tutorial videos, sponsorships, events and summits, and closed groups like Telegram and Discord

Events: Tezos India has conducted 18+ events (like sessions in collaboration with upcoming platforms on Tezos, a masterclass with Tezos India President, fireside chats, and sessions in various summits & AMAs)

Workshops: We have conducted 100+ workshops so far (as a part of hackathons, fellowships, Tezos clubs, and other ad-hoc events)

Hackathons: We have conducted 125+ Hackathons including individual, sponsored and in collaboration with other organizations

Projects: Building actively on Tezos from India

Premier Education Institutions: IIT Madras and IIT Hyderabad are contributing to the core Tezos protocol R&D

University Engagements

Proud to announce our collaboration with 'Technical Council Club'

The background features a glowing handshake between two hands, each surrounded by a network of blue and orange lines, symbolizing digital connectivity.

Tezos India is proud to announce our collaboration with the "NextTechLab, SRM University"

The background features a glowing handshake between two hands, each surrounded by a network of blue and orange lines, symbolizing digital connectivity.

The Genesis Block of your Blockchain Journey

The background features a dark blue gradient with abstract geometric shapes and a faint watermark of a person's face.

Tezos Clubs

Tezos Clubs are set up at various universities to educate the students about Tezos blockchain. It is an annual development program for blockchain enthusiasts to learn from the leaders in the ecosystem via workshops and in-house hackathons. The course is curated based on the expertise of the target audience, first three months focus on training students on fundamentals and basics of blockchain, followed by educating them on building & deploying smart contracts. Hack-7-days (in-house hackathon) is conducted for the university students to gauge their knowledge level and to prepare them for inter-college and other global hackathons.

Tezos India is running Tezos Clubs in 4 universities in India and has plans to expand it to 10 by the end of the year. Tezos Developer community Vellore, Crypto NIT Trichy, Next Tech Lab, SRM University, Andhra Pradesh, NIT Hamirpur and many more.

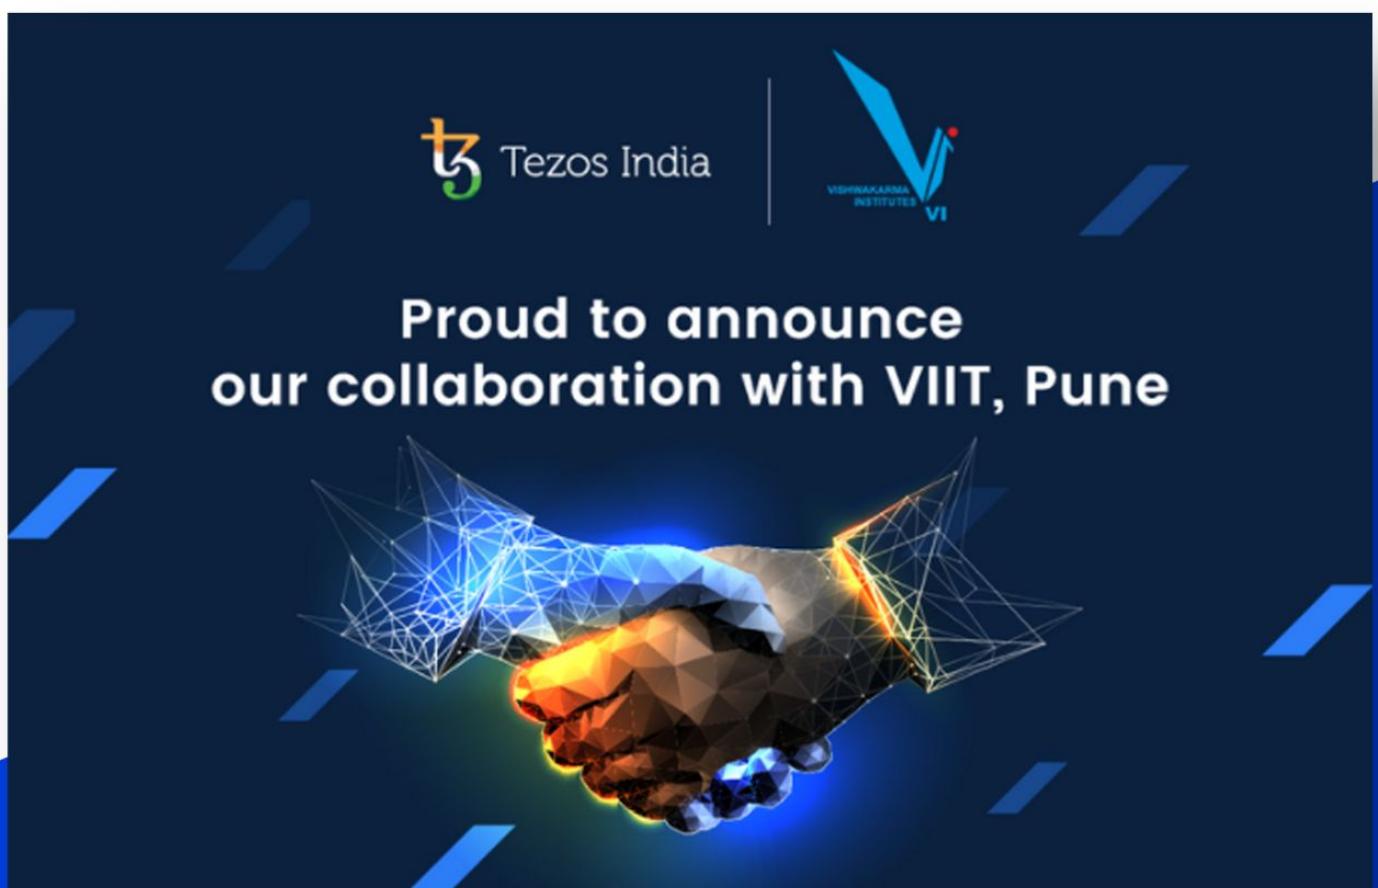

Currently, Tezos India is training **650+** students across all the universities as a part of these clubs.

University Engagements

Tezos Students Chapter

Tezos students chapter aims to add Tezos curriculum in colleges/universities. As a part of the students' chapter, Tezos introduces the tezos curriculum in the universities, provides hands-on lab experience, organizes and facilitates in-house hackathons, supports student-led incubators, and supports rising talent with internship opportunities. We educate students and provide weekly mentorship. This is an end-to-end formal arrangement with the faculty in the universities, unlike Tezos clubs which are student-based and focused on blockchain enthusiasts who are willing to learn and participate. This is more like a course that is taught in the universities by instructors and students, Tezos India provides all the resources from content to content delivery. Students chapter aims to train all the students in a university, those who are interested pursue it further after college.

Tezos India has recently initiated a students chapter in 2 universities, planning to train ~5000 students (2nd, 3rd, and final year), and has plans to extend this initiative further for other colleges/universities and to grow its developer community many-fold.

Community Partnerships

Collaboration with Figment

Tezos India collaborated with Figment during TIF 2.0 to help students learn Tezos through the 'Tezos Learning Pathway' offered on their Learn platform.

The collaboration provides 1,496 INR to all the candidates who take the Tezos course on the 'Learn Platform' offered by Figment. It provides 'Plus' membership / Extra credits for the shortlisted candidates/fellows who will integrate DataHub in their projects and sponsorships to the selected candidates i:e; Access to Plus/Pro plan of Tezos + DataHub to help fellowship candidates in scaling their projects. Further, as a part of the collaboration, Figment offers grant opportunities of up to **1,49,747 INR** for the exceptional projects to write tutorials on the project and to publish them on Figment Learn. Figment provides marketing support for Tezos India events and Tezos India encourages students to learn using the Figment platform.

Community Partnerships

The Blockchain School

The Blockchain School is an ed-tech platform, which focuses on experience-based learning in the form of online cohorts and communities. It is our knowledge partner. Blockchain school has a wider community.

It has 25000+ learners from 30+associated universities, 15000+ community members, 60000+ average monthly minutes of attendance/learning.

Blockchain school promoted Tezos India students and going forward will provide knowledge sessions to the participants after Tezos fundamental course is added on their platform.

Community Partnerships

Microsoft Century Program

Tezos India and TZ APAC have partnered with Microsoft, Skoda, and Tech Mahindra to deliver the Microsoft Century Program – a corporate-SME bridge program that seeks to uncover blockchain-based solutions on Tezos, for industry-specific use cases.

The first iteration of the program will focus on Discrete Manufacturing, with a particular focus on automotive manufacturing, supplier management, product authentication, supply chain, and more.

As a part of the program, startups who are willing to build supply chain-based solutions on public blockchain have connected with Tezos for support. Tezos India is helping these startups build their solutions on the Tezos platform through mentoring and technical support for deployment.

Fellowship & Hackathons

Tezos India Fellowship

Tezos India Fellowship is our flagship event. **Season 1 for Tezos India Fellowship was hosted in July 2020**, which focussed on upskilling the top Web3 talent and onboarding them to the Tezos ecosystem over a period of 8 weeks. The fellowship turned out to be a big hit among the hacker community in India. We received 1400+ applications in 2 weeks, out of which 10 developers were selected. It is more like a pre-accelerator program where we facilitate workshops, mentorships for the participants to learn over the course of their journey. As a result, we received 7 amazing projects. Two out of the 7 projects have received grants of up to **7,48,735 INR** to continue the development of their projects and take them to production. Some of the others have joined Tezos India and other organisations in the ecosystem. Read more about the first edition [here](#).

Fellowship & Hackathons

Tezos India Fellowship

Season 2 for Tezos India Fellowship is ongoing, starting in August 2021 like TIF 1.0, it is an 8-week program for India's best hackers to enter the world of the web3 ecosystem. Building upon the success of TIF 1.0, this time we received ~3x participation as compared to the last time, i.e. 3800+ with 18% female participation. This year we also increased the stipend from 74,868 INR to 1,49,747 INR disbursed on a milestone basis, with additional prize money for best blog and documentation (74,868 INR- 2,24,602 INR). We selected 30 fellows who were trained using our professionally curated content delivered by the leaders in the industry, via workshops. **Tezos India Fellowship 2.0 PR**. The participants are asked to create detailed proposals after these knowledge sessions. Based on which, they are mapped to 1:1 mentors (per team one mentor) for continuous technical support throughout the program.

This time we received **15 e2e DApps** at the end of the program. The participants can further apply for our EGG (Ecosystem Growth Grant) program to get additional funding.

The screenshot shows the Tezos India Fellowship landing page. At the top, there are three logos: Tezos India Fellowship, PRESENTED BY Tezos India, and POWERED BY Devfolio. Below this, there are four hexagonal icons with corresponding text: "Learn, grow and contribute to open source" (yellow icon), "Get mentored by industry leaders" (blue icon), "Earn \$2000 in stipend" (purple icon), and "Be part of a global community" (green icon). At the bottom, there are two sections: "TIMELINE" (8 Weeks Program) and "APPLICATION DEADLINE" (3 July 2021).

Fellowship & Hackathons

TEZASIA Hackathon

TEZASIA is a regional hackathon organized by Tezos India in collaboration with TZ APAC. This Pan-Asia hackathon invites developers from all walks of life to come and participate in a month-long event.

TEZASIA Season 1 started in early August'21 and continued for a month. Tezos India along with TZ APAC hosted Asia's largest and biggest hackathon to discover great minds and untapped potential across the globe. We partnered with Chainstack to provide all our participants with state-of-the-art blockchain infrastructure for building extraordinary projects. The hackathon was open to ALL - newcomers, advanced coders, students, working professionals, blockchain enthusiasts, and others. **TEZASIA Hackathon PR**.

The theme for the Hackathon was Sustainability. Tezos network is a Proof of Stake blockchain that consumes over two million times less energy than Proof of Work networks like Bitcoin or Ethereum. The low carbon footprint of Tezos indicates that the developers and users can prioritize innovation without compromising sustainability.

Fellowship & Hackathons

TEZASIA Hackathon

We proposed a tough challenge to the participants to co-create new and green-tech solutions using Blockchain under these three broad categories: DeFi, NFTs & Collectibles, and Tools & Wallets.

2 weeks of workshop sessions were conducted to help strengthen both the **foundational** as well **functional knowledge** on Tezos. The sessions were more focused on topics like - writing a smart contract, its deployment, token standards, how to build the front-end of a DApp, integrating a wallet for signing transactions, etc. Functional workshops were focused on effective deliverables in each of the tracks like how to build a DeFi product or an NFT platform. Many industry leaders joined in to take up some of these sessions. Founder/co-founders from **PlentyDeFi**, **Taquito**, **Cryptonomic**, **Hover Labs**, **AirGap**, and **Kalamint** and engineers demonstrated their projects e2e and spoke about the best industry practices and engineers from Nomadic Labs emerging trends in the crypto space.

We have invited thought leaders from the Blockchain Industry, famous Venture Capitalists to share their valuable insights for the final selection on the **demo day, Sept. 12th**

The jury selected **Tezco** as the winner – a global carbon currency that can enable the purchase of carbon-emitting products via gamification, NFT, and P2P DeFi staking, to reduce the impact of climate change by integrating the Tezos network to provide universal and transparent transactions. In second place was **Radiate Finance**, a streaming protocol in which users can create a stream to transfer tokens in real-time. **Omni Swap** – a credit default swaps solution on blockchain to remove over-collateralization requirements in loans facilities – came in third.

"TezAsia brought forward eager participants who put transformative solutions and sustainability at the forefront of their projects. We are looking forward to conducting more programs in the future to foster the growing blockchain talent and make the region stronger than ever."

- Om Malviya, President, Tezos India.

Fellowship & Hackathons

TezIndia V. Harappa Hackathon

India's first online hackathon on Tezos was conducted in early 2020. It's a month-long hackathon where participants can learn, brainstorm & build the products on Tezos. In preparation for the hackathon, three preparatory workshops were held on the Basics of Blockchain & Tezos workshop held by the Cryptonomic Tech Team. We received 660 registration from different colleges/universities across India. **19 teams** submitted their projects, **top 5** were selected to win from a prize pool of more than 4,49,090 INR.

TezIndia paved the way for us to capitalize on the developer talent in India. One year later, we received 12+ projects building on Tezos, from India, including two premier-level institutions. (IIT Madras and IIT Hyderabad)

Fellowship & Hackathons

Hack-7-Days Hackathon

Tezos India organized its first **hack-7-days hackathon** in April 2021. It was a week-long hackathon to get the developers to kick-start the Tezos Ecosystem Journey. Workshops were organized for the participants to educate them about the fundamentals of blockchain & Tezos, writing & deploying a smart contract on tezos, & opportunities to explore at Tezos Ecosystem. Discord channel was established for mentor support and hack-updates. We received 52 registration from Tezos Clubs at NIT, Hamirpur College & SRM University, Chennai. 6 teams submitted their projects. The best two teams won prizes up to 15,000 INR. They were further provided the grant opportunity of INR 400,000. There were additional swags and incentives for students who completed courses on **cryptocodeschool** as the event is focused more on learning than winning. Participants were encouraged to participate in engagement activities like Tezos Trivia and Tezos meme contests to build an informal relationship with other participants for better collaboration. The best meme and winner for Tezos trivia was also incentivized. **Discord Server Link**

Sponsored Hackathons

A university/college-based hackathon across India in collaboration with Devfolio, our season hackathon partner. In the past, we have sponsored a total of 100+ hackathons with **17 project submissions** out of which 10 projects received Tezos India hackathon bounty. Currently, we have 7 upcoming hackathons. Tezos India provides 20,000 INR for the best project built on Tezos Ecosystem and a grant opportunity of up to 3,76,548 INR for the best project in every sponsored hackathon.

Fellowship & Hackathons

Hack Kala

Tezos India has collaborated with Kalamint, the clean NFT marketplace on Tezos to organize a hackathon - 'Hack Kala'.

Hack Kala aims to provide an exclusive opportunity for the developers to up their blockchain game and win exciting prizes! Hack Kala invites developers to build solutions to represent statistics for the Kalamint website. (Number of sales, total volume, avg sale price, volume per day, sales per day, etc.) and to show all the seller/artists' statistics like total sales, primary sales, secondary sales, and royalties. This hackathon is open to ALL - newcomers, advanced coders, students, blockchain enthusiasts, and others. Participants stand a chance to win over **INR 3.7+ Lacs in prizes** and a chance to win exclusive NFTs from the platform. Every selected participant will receive exclusive NFTs worth ~100 Tez minted for the hackathon and Tezos merchandising.

The registrations for the hackathon are closed and we received more than 60+ teams interested to build the solution to the proposed challenge. The mentorship support will be provided by the Tezos India team during the building phase which is during the first two weeks of October.

Educative Initiatives

Tezos course on The Blockchain School Platform

The Blockchain School is an ed-tech platform, which focuses on experience-based learning in the form of online cohorts and communities.

Tezos India has collaborated with The Blockchain School to create instructor-led courses for Tezos on the platform. **Course structure** and the content has been curated for the students for learning development on Tezos. The course will be free for the students who want to get started with Tezos and it will be available for registrations starting from November last week.

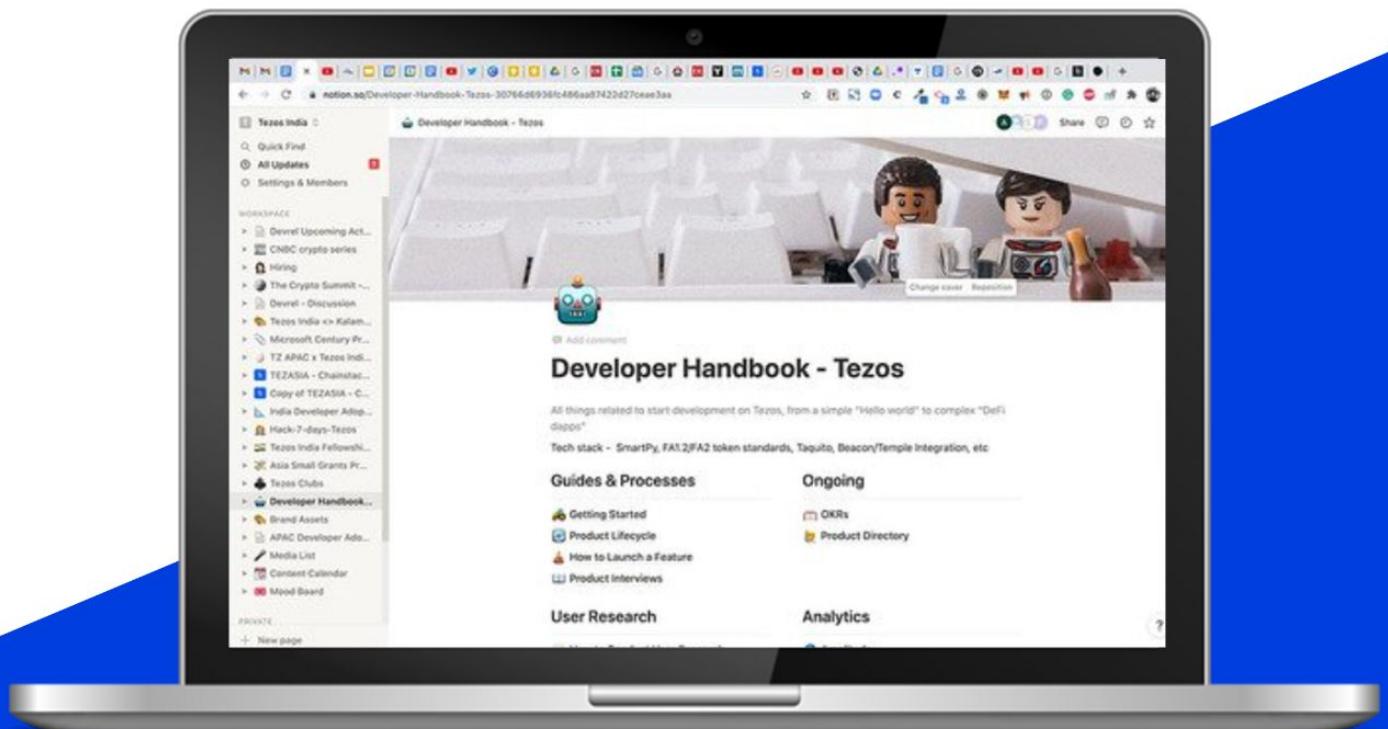

Educative Initiatives

Tezos Developer Handbook

We are delighted to share that together with TZ APAC we are working on Tezos Developer Handbook. It is a work in progress and due by November end.. The requirement came in while conducting hackathons as we realized that participants who aren't much familiar with Web 3.0, need a quick guide (15-days) to start building their DApps on Tezos. Developer Handbook edition 1 was out during TEZASIA and we aim to complete it before our next big Hackathon Tez India due in Q1, 2022.

The course structure and edition 1 for the handbook were released in mid-August.

We have also published a tutorial series about Tezos on our Youtube channel explaining about Tezos. The series is called **Introduction to Tezos - Series of basic Tezos sessions**

Events & Workshops

Tezos India has conducted 18+ events (like sessions in collaboration with upcoming platforms on Tezos, a masterclass with Tezos India President, fireside chats, and sessions in various summits & AMAs (Ask me Anything). AMA is a telegram & online-based event where we collaborate with different crypto exchange platforms, crypto trading platforms in India to educate people about Tezos. Participants can ask questions related to Tezos. We have conducted AMA with **Binance Telegram platform**, AMA with **CoinDCX Telegram platform**, and **CoinCrunch Media (YouTube Live)** and received 1000+ participation with an overall outreach of 40,000+ people.

We have conducted 100+ workshops by far (as a part of hackathons, fellowships, Tezos clubs, and other ad-hoc events).

Events organised in collaboration with

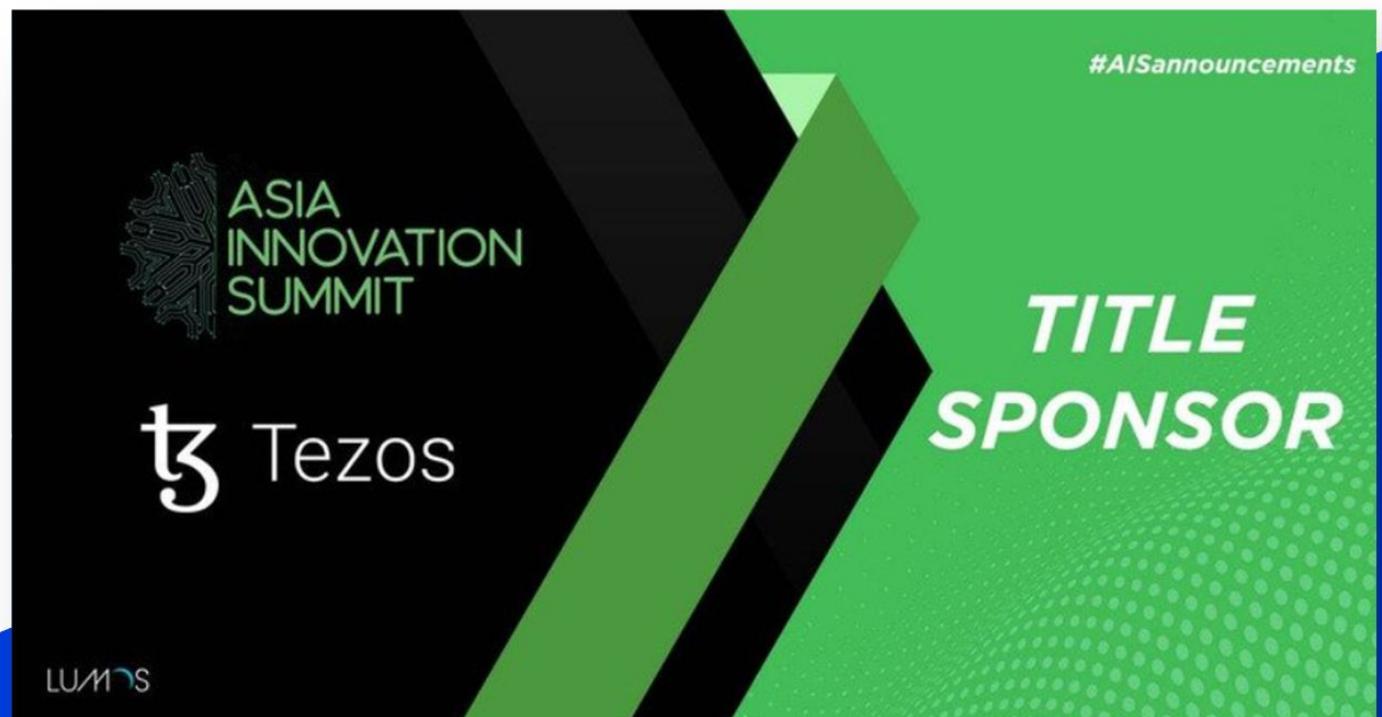

Events & Workshops

Asia Innovation Summit (AIS) 2021

It is the largest online conference in Asia with over 7,000 attendees participating in 20+ Panel Discussions, Tech Talks, and contextual networking sessions by academicians and innovators including Om Malviya, president of Tezos India. Asia Innovation Summit, 2021 was powered by Lumos Labs, Woodstock Fund, Dao Maker, and Tezos.

The summit showcased implementable and scalable innovation across Asia and put the spotlight on the burgeoning innovation in the region. Extending over 7 days between July 14 - 21, 2021, it was a culmination of a month-long program that aimed to enable contextual networking opportunities through intriguing panel discussions, one-on-one tech talks with industry experts, and employment opportunities for developers and students with **20+ global enterprises** in the region's tech ecosystem.

Events & Workshops

The Crypto Summit 2021 - Inc42.com

Tezos has joined hands with Inc42 for The Crypto Summit - India's largest crypto and blockchain summit. Held on September 18 and 19, The Crypto Summit by Inc42 Plus saw the participation of more than 1,500 attendees. Spread across 2 stages, the conference brought together 60+ founders, investors, and enablers as speakers.

1500+

Attendees

60+

Founders participated

Om Malviya, President, Tezos India

The Crypto Summit by Inc42 is an important milestone for the entire crypto ecosystem in India. This is the time for all stakeholders in the Indian tech and startup space to come forward, join hands and enable the next wave of innovation right from India, for the world. This event helped Tezos India and all other blockchain entities to send that message forward.

Plans for Q4, 2021 and beyond

01

Setup more Tezos Clubs

We plan to set up more Tezos Clubs and student chapters. Also, we are focused on spreading awareness through more community collaborations and partnerships.

02

Organize more Hackathons

In order to increase Tezos influence in the region, we will be conducting more in-house, nationwide & APAC region hackathons.

03

Work with more Startups

Developers will be provided opportunities to work on live Tezos India projects. We will also facilitate hiring for other companies building on Tezos.

04

Increase our Social Media Influence

Our major focus would be on our social media strategy and marketing initiatives to strengthen influence within and outside the region.

05

Train more Developers

We will create Tezos clubs starter ppt pack (with Tezos clubs structure, annual schedule, and knowledge sessions/content) for Tezos clubs to share within our Tezos ecosystem to replicate similar efforts in various other regions outside India.

Plans for Q4, 2021 and beyond

Hack-7-Days

We plan to conduct Hack-7-days for 3 universities where we are currently running our Tezos clubs. The focus would be to conduct it after we complete three months of beginner module training for the developers. It will be an in-house hackathon, a 1-week program.

Further, we will divide it into a 3-week program - beginner, intermediate & advanced level hackathon. After the beginner level, the participants will move to the next level of the hackathon. The best project built on each level will receive a reward of around 15,000 INR. We also plan to conduct inter-college hackathons starting next year.

TezIndia Hackathon 2.0

Building on the success of TezIndia 1.0, we plan to conduct one of the biggest blockchains hackathons in India in Q1, 2022.

Tezos India Fellowship 3.0

Every year, Q3 Tezos India runs its fellowship program. This is one of our most successful flagship events and we aim to continue this every year to support Web 2 hackers entering the Web 3 ecosystem. We plan to conduct season 3 in Q3, 2022 with more fellows and increased incentives.

Sponsored Hackathons

We aim to continue our support for hackathons on the Devfolio platform as it has been highly productive for the ecosystem. We extend workshop support on special requests by the participants. The submission rate has been really good and the quality of projects is largely improving. We have received 15 submissions as a part of these sponsored hackathons and have connected with the participants to help them to convert their DApps to and help them get offers from other teams in the Tezos ecosystem.

We will plan to increase the hackathon bounty based on the level of submissions going forward.

Intermediate Tezos course on Blockchain School Platform

Intermediate level tezos course on blockchain school platform after the completion of basics course this year. The team will analyze the effectiveness of the fundamentals course and prepare content for intermediate and then advanced courses. The courses will complement the three handbook editions - basic, intermediate, and advanced that we plan to roll out in collaboration with TZ APAC. The detailed handbook editions are due post-November after we receive a developer handbook quick guide which is focused on 'how to build on Tezos in 15 days.'

Community Reward Program

Tezos India encourages all those who give back to the ecosystem via workshops, sessions, mentorship, project support, or funding. We will outline a detailed plan by Q4 for initiating a rewards program for incentivizing all such efforts.

Plans for Q4, 2021 and beyond

Ecosystem Development & Tech Support

In 2021, we also added one more functionality in our organization, Ecosystem development, and tech support for startups, corporates in India to integrate Tezos, build on Tezos or just learn about Tezos.

By far we have extended our support for Koinearth, Futuresense, Shuttleone, Alibaba Cloud platforms and have helped 2 teams migrate their existing solutions to Tezos (end to end) and helped many teams to resolve technical doubts, issues regarding Tezos development, Tezos baking, etc. We also provide tech support to our partners like TZ APAC and help them whenever they require tech expertise. Eg.- Oropocket, Kalamint, KoineArth, Shareable assets, Alibaba Cloud, Ramp Defi, Bot Wars, etc.

Hiring Facilitation for TZ APAC and Tezos India Grantees

Tezos India facilitates hiring for startups/ companies/ organizations like Superstar exchange, Bollywood-based NFT project, Rocket Monsters from its large pool of developers it trains on Tezos Blockchain via various programs, events, clubs, hackathons, etc. We aim to continue this support for growing the overall Tezos ecosystem in India and beyond.

Brand Awareness & Social Media Strategy

Apart from all the verticals of Tezos India on the adoption side, we also want to focus that this year we will be working to further increase brand awareness of Tezos as a blockchain protocol and cryptocurrency in India. We will be partnering with publications, magazines for sponsoring summits and publishing articles that will drive brand awareness.

The Team

With these growing initiatives, our team is growing day by day. We also provide hiring opportunities to the developers we train via various programs. Here is Tezos India team.
